

SUBMITTED QUESTIONS:

Q: How will permits be acquired for the installation?

A: The Partnership will secure all permits from NYC DOT and all other City agencies.

Q: Will overnight security be provided to keep the installation secure?

A: The Partnership will provide on-site security during the installation period.

Q: What will be the procedures for daily care, maintenance, and technical issues?

A: The Partnership manages the Flatiron North Plaza, will facilitate opening and closing daily, and communicate any technical maintenance issues to the design team throughout the installation period.

Q: Will the Partnership provide space to store equipment during the installation period?

A: We prefer pallets, dollies, and packing materials are stored offsite by the design team as we do not have abundant space in the district.

Q: Is the existing installation requirement a preference or an absolute requirement? If required, is the reconfiguration of the existing piece a possibility?

A: The Partnership is only considering pieces that are prefabricated. However, we welcome reconfigurations and modifications if they have been outlined and included in the quote.

Q: Is a submission more appealing to propose an installation with multiple experiences or one big experience?

A: A “centerpiece” installation is preferred though we will consider proposals with multiple engagement opportunities.

Q: Where can the activation be located?

A: Please keep all activation items within the yellow highlighted permitted space on the [site map](#). We may also consider proposals that extend to the [Flatiron South Plaza](#) but please note the South Plaza does not have access to electricity.

Q: What is the installation period? When will the installation be dismantled?

A: The installation period will likely be December 2023 & January 2024 with de-installation in early or mid-February 2024.

Q: What is the sound limit?

A: Ambient or background-level sound is permissible. Sound is preferably intermittent and activated via engagement with the installation(s).
